

NeXtOPC Gateway

NeXtOPC Gateway unifies the most common communication protocols in the industrial automation field in an **OPC UA** server connection.

This gateway provides **continuous communication** between the Fieldbus protocols and systems that communicate using the OPC UA protocol when there is no possibility of installing a classic suite of software protocols.

NeXtOPC Gateway extracts information from existing systems that use widespread but not homogeneous communication protocols, and transmits it to IT applications, Cloud services and SCADA systems for further processing.

- easily configurable Plug & Flay OPC UA Gateway
- Ideal for industrial plants
- Easy integration with ERP, MES and SCADA
- Multi-platform support
- Excellent price / performance ratio

AVAILABLE PROTOCOLS	
Allen-Bradley EtherNet/IP	Modbus TCP-IP Slave
Bacnet/IP	Omron EtherNet/IP
GE Ethernet	Omron FINS Ethernet
IEC 60870-5-104 TCP/IP	OPC UA Client
IEC 61850 MMS Client	Panasonic FP MEWTOCOL
Malsec FX Series	Saia DATA Mode
Malsec FX TCP Series	Siemens PC Adapter – MPI
Malsec-Q TCP	Siemens PPI
Modbus Serial	Siemens S7 TCP
Modbus TCP-IP	SNMP Manager
Modbus TCP-IP Slave	SQL Driver
